## Billet Grab Handle Installation Instructions

### General Installation Notes:

Please read these instructions completely before beginning the installation. If you have any questions, please call.

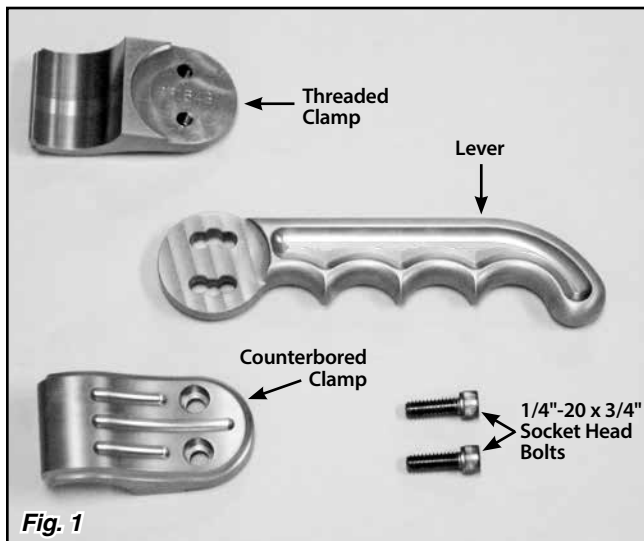

We recommend using anti-seize lubricant on all aluminum threads.

Refer to Fig. 1 for the component names.

**Step 1:** Use a 3/16" Allen wrench to loosen the 1/4"-20 x 3/4" socket head bolts.

The Billet Grab Handle can be assembled at three different angles, as shown in Fig. 2. If you are changing the angle of the lever, remove both socket head bolts completely. Loosely reassemble with the lever in the position that you want.

**Step 2:** With both bolts loose, spread the clamps apart, and position the Grab Handle where you want it on the roll cage. Tighten the bolts using a 3/16" Allen wrench. Fig. 3
